Ready for School? Kids Vision Questionnaire

Could your child have a vision problem?

Take this simple yes or no assessment for your child. If you answer "yes" to more than one question, or your child has not seen an optometrist in over two years, it's time to schedule an appointment.

DOES YOUR PRE-SCHOOLER:		
	YES	NO
Have an eye that ever appears to be out of proper alignment		
Tend to bump into objects		
Have red eyes or lids		
Rub eyes frequently		
Have excess tearing		
Turn or tilt head to use one eye only		
Have encrusted eyelids		
Have frequent styes		
Avoid coloring, puzzles or detailed activities		
Experience difficulty with eye-hand-body coordination		
DOES YOUR SCHOOL-AGE CHILD:		
	YES	NO
Lose place while reading		
Avoid close work		
Hold reading material closer than normal or shift the reading distance		
Tend to rub eyes		
Have headaches		
Turn or tilt head to use one eye only		
Make frequent reversals when reading or writing		
Use finger to maintain place when reading		
Omit or confuse small words when reading		
Consistently perform below potential		
Struggle to complete homework		

Regular eye exams, starting when your child is just six months old, by a doctor of optometry can help you be certain that your child's vision is developing normally. Since vision changes can occur without you or your child noticing them, your child should visit the optometrist at least every two years, or more frequently, if specific problems or risk factors exist. If needed, the doctor can prescribe treatment including eyeglasses, contact lenses or vision therapy. Keep in mind, a school vision screening, while helpful, is not a substitute for a comprehensive eye examination. Schedule your child's back-in-school eye examination to make the most of a good education.
